

Building Code Product Approval

Effective January 1, 2014

Sunesta is excited to announce that it is the first retractable awning manufacturer in the USA to receive the prestigious acceptance of “Miami Dade County Product Control Approved” for its retractable patio awnings – the Sunesta, Sunstyle, Sunlight and Sunflair.

NOA #13-1104.18 (notice of acceptance)

The Department of Regulatory and Economic Resources Product Control Section for Miami Dade County announces this New Product Approval that provides high wind performance validations for both the consumer and building officials for building code compliance and project architectural design acceptance.

Sunesta retractable patio awnings were tested for dynamic loads up to 90mph wind speed while extended, exceeding the 75 mph wind speed specified in section 3105 of the Florida Building Code.

This product approval also exceeds the qualifications for the High Velocity Hurricane Zone (HVHZ) and the International Building Code (IBC).

The requirements of this product approval include using the specified awning brackets, bracket fasteners, and bracket spacing – which are documented in our product installation and spec sheets. Another requirement is bearing the following permanent label on each patio awning:

 AWNINGS & OUTDOOR COMFORT	11320 Distribution Ave E. Jacksonville, FL 32256 info@sunesta.com www.sunesta.com								
 NOA #: On File	This awning must be fully retracted for any wind event with speeds exceeding 45 MPH. Maximum Design Pressure Capability: <table><tr><td>Open</td><td>Closed</td></tr><tr><td>5.8 PSF</td><td>49.5 PSF</td></tr><tr><td>45 MPH</td><td>175 MPH</td></tr><tr><td>Wind Speed</td><td>Wind Speed</td></tr></table>	Open	Closed	5.8 PSF	49.5 PSF	45 MPH	175 MPH	Wind Speed	Wind Speed
Open	Closed								
5.8 PSF	49.5 PSF								
45 MPH	175 MPH								
Wind Speed	Wind Speed								
“Miami Dade County Product Control Approved”
